

Website Design with HTML & CSS

Skill Level: Intermediate

Are you ready to learn about web design? Tired of the restrictions of some of those HTML editors. such as Frontpage or Dreamweaver? In this class, you will learn to write HTML code!! Not only the basics, but we will also cover supplemental CSS (Cascading Style Sheets). You will learn all you need to know to put together a powerful and technical website! The best news... by learning the actual code, you are no longer restricted to what the editors or hosts support!

During class you will design your very own website, complete with rollover effects on your navigation menu! You can even burn it to a CD and take it with you.

Some of the things you will learn in this class:

- Hyper Text Markup Language Codes
- Website structure and navigation
- Creating hyperlinks and mailto links
- Inserting images on web pages
- Background Colors
- Tables
- Creating menus with CSS rollovers
- FTP (File Transfer Protocol)
- Meta Descriptions & Keywords
- And more!

The knowledge you will gain in this class can be applied to any HTML editor or WYSIWYG (What You See Is What You Get) program.

Whether you need classroom style training for your entire company, a group presentation or a one-on-one class, we have a class for you!
