

# Microsoft Office 2007

Skill Level: Basic

Microsoft Office 2007 has a tremendous amount of enhanced functionality, along with a completely new layout of the menus and toolbars. The new layout can leave you struggling to find buttons and functions that you have known for years! Our Office 2007 class will get you working in the new system with efficiency and we'll even show you some new features that might just save you time and money!

In Office 2007 we explain the logic behind the new layout including the Tabs, Ribbon, Office Button, Quick Access Toolbar, and Live Preview. We can cover new features in the individual programs such as Outlook, Word and Excel. Some of these features include the new Header/Footer templates, Picture formatting functionality, Contextual Tabs, Sorting, Chart ribbon, Flagging, Color Categories and more!

You should have a working knowledge of Office as we are reviewing the new functionality only. We also offer classes in each individual subject for those who are new to the programs.

**NOTE!** This class can be completely customized to meet your needs! Mix and match by program (Word, Excel, Outlook) or subject (Pictures, Mail Merge, Categories, etc).

## Some of the things you can include in the class:

- Office 2007 layout
- Ribbon
- Quick Access Toolbar
- Live Preview
- Mini-toolbar
- Tabs, Groups & Command Buttons
- Outlook 2007 – Flags, Color Categories, Office Button
- Word 2007 – Header/Footer templates, Text boxes, Picture Formatting
- And More!

Whether you need classroom style training for your entire company, a group presentation or a one-on-one class, we have a class for you!
