

# Adobe Photoshop 2

Skill Level: Advanced

Calling all Photographers! This class is designed to cover the more advanced features of the Adobe Photoshop CS program, specific to digital photo editing and enhancement. This is a great follow up to our Digital Photo Editing class. We will begin with a basic overview of the Photoshop work area, color modes, image resolution, tools and palettes, and move on to working with the more advanced features of the program. You will learn to remove red eye, air brush (helpful for those of you who shoot portraits), dodge and burn specific areas of the photo, remove objects of an image, and more!

This class is an Advanced level class, as you need to be familiar with the basics of computing and digital photography. Adobe Photoshop experience is helpful.

## Some of the things you will learn in this class:

- Learning the Photoshop Work Area
- Tools
- Palettes
- Digital Image Color Modes
- Digital Image Resolution
- Removing Red Eye
- Dodging and Burning
- Removing an Object from the Image
- Touching up Spots, Scratches, and Wrinkles
- Applying Filters and Special Effects
- Air Brushing
- Watermarking
- Combining Two Photos
- Lighting Effects
- Defining Patterns
- And more!

Whether you need classroom style training for your entire company, a group presentation or a one-on-one class, we have a class for you!
